Skills for MRCS OSCE**

Feedback - January 2015

Manchester Clinical & Procedural Skills for MRCS OSCE

This intensive one-day revision course covered the clinical and procedural skills components of the MRCS Part B exam.

In the Intercollegiate MRCS OSCE Exam, the 'Clinical and Procedural Skills' component, makes up about 15-20% of the total marks. It will test the candidate's capacity to apply sound basic science clinical knowledge in a practical context, as well as the candidate's ability to perform practical tasks related to surgery that require: manual dexterity, hand-eye coordination and visual/spatial awareness. In addition, it also tests aspects such as capacity, consent, theatre safety, the WHO checklist and general principles of safe surgery.

This intensive hands-on practical skills course took candidates through all the procedures that have been examined in recent years. With practice in realistic exam conditions and structured feedback provided to further their development. Candidates were all provided with their scores following the event and received the opportunity to discuss specific practical aspects with both examiners and recent successful candidates.

Course Information

Course date:	30th January 2015
Venue:	Christie Hospital, Manchester
Attendance:	15 Delegates
Aimed at:	Delegates looking to take their membership to the Royal College of Surgeons Part B exam.
Course fee:	£185.00
